### Ultimate Flexibility • Environmental Quality • Cost Control

Winstar World Casino in Thackerville, OK is one of North America's 5th largest casinos. ASM Modular Systems, Inc. has already laid 142,000 sq. ft. for Winstar World Casino and is preparing to lay 75,000 sq. ft. more for them. "WinStar World Casino offering world-class gaming, entertainers and cuisine is Oklahoma's largest casino and one of more than 50 businesses owned and operated by the Chickasaw Nation. Net income from these businesses provide essential and vital services such as health care, aging, youth and family, educational and transportation services to the people of the Chickasaw Nation."

ASM's Raised Access Floors systems deliver total environmental comfort by giving you the ability to control thermal, energy and air quality control levels, zone by zone, through out the casino. Improve indoor air quality and environmental integrity with saving energy.

ASM's GameSpace Casino Floor System delivers flexible modular design, allowing you to adapt to rapid technological change, and to alleviate the high cost of constant gaming shifts. ASM underfloor systems facilitate updates to your technical capabilities, floor plan, HVAC controls, and interior image.

Flexibility: quick and low-cost interior reconfiguration and point of use services, thanks to our fully integrated modular systems. Down time is minimal. An access floor provides you with access to your service pathway at any location on the floor stage, with finished floor heights that accomodate any requirement.

ASM delivers the most advanced technology with long-term value built into its flooring systems - assuring return on your investment. Durably built to last, ASM's GameSpace Casino Floor System provides easily manageable, low cost solutions as the demands of technology and patron satisfaction present themselves.
